

Investor Briefing Webinar

OD6 Metals Limited (OD6 or the Company) is pleased to advise shareholders and investors that the Company will be conducting a live investor briefing webinar following the announcement of an intention to acquire the Gulf Creek Copper Project in NSW, Australia.

OD6 Managing Director, Brett Hazelden will be providing an investor update and the briefing will be followed by an interactive Q&A session.

The Company invites shareholders, investor and media to participate in this online event by registering via the link below:

WEBINAR URL: <https://bit.ly/4hotFis>
DATE: Thursday 31st October 2024
TIME: 9.00am (AWST) / 12.00pm (AEDT)
DURATION: ~ 30mins

The Company also encourages participants to send questions in advance to Lucas Robinson at info@corporatestorytime.com

A link to the replay of the webinar will be posted on OD6's social media as soon as it is available for those unable to attend the webinar.

This announcement has been authorised for release by the Board of OD6 Metals Limited

About OD6 Metals

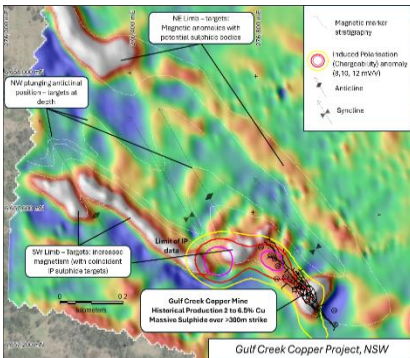

OD6 Metals is an Australian public company pursuing exploration and development opportunities within the critical minerals sector, namely rare earths and copper.

OD6 Metals has successfully identified clay hosted rare earths at its 100% owned Splinter Rock and Grass Patch Projects which are located in the Esperance-Goldfields region of Western Australia.

The Company released a Mineral Resource Estimate (MRE) for Splinter Rock in May 2024, confirming that the project hosts the largest and highest-grade clay-hosted rare earths deposit in Australia with a Resource of 682Mt @ 1,338ppm TREO with ratios of ~23% high-value Magnetic Rare Earths (MagREE).

OD6 Metals believes that Splinter Rock has all the hallmarks of a world class rare earths project with a conceptual development which utilises the large and high-grade Splinter Rock resource to support a long-life REE operation supported by a low strip ratio and favourable power and reagent costs.

The Company is also looking to advance the proposed acquisition of the Gulf Creek Copper-Zinc VMS Project located near the town of Barraba in NSW, Australia.

Gulf Creek was mined at around the turn of the 20th century and was once regarded as the highest grade copper mine (2% to 6.5% Cu) in NSW until its closure due to weak copper prices in 1912. Very little exploration has occurred at the project in over 100 years, with OD6 aiming to apply modern day exploration technologies.

Mineralisation is associated with magnetite, with geophysics showing significant greenfields and brownfields exploration potential exists with over >3km of untested strike in the immediate mine-stratigraphy, and over >10km across the tenement.
