

## **CLEANSING NOTICE**

The Board of OD6 Metals Limited (ASX:OD6) (the Company) hereby provides notice to the ASX for the purposes of section 708A(5)(e) of the Corporations Act 2001 (Cth).

Further to the announcement on 30 October 2024 and 15 January 2025, the Company confirms it issued 6,000,000 fully paid ordinary shares (**Acquisition Shares**) to the vendors of the Gulf Creek Project.

The Company gives notice that:

- a) the above-mentioned Acquisition Shares were issued without disclosure under Part 6D.2 of the Act;
- b) this notice if being given under section 708A (5) (e) of the Act;
- c) as at the date of this notice, the Company has complied with:
  - (i) the provisions of Chapters 2M of the Corporations Act, as they apply to the Company; and
  - (ii) sections 674 and 674A of the Corporations Act; and
- d) as at the date of this notice, there is no excluded information within the meaning of sections 708A(7) and section 708A(8) of the Corporations Act which is required to be disclosed by the Company.

Authorised for release by the Board of OD6 Metals Limited.

## About OD6 Metals

OD6 Metals is an Australian public company pursuing exploration and development opportunities within the critical minerals sector, namely rare earths and copper.

### Copper

The Company is also looking to advance the proposed acquisition of the **Gulf Creek Copper-Zinc VMS Project** located near the town of Barraba in NSW, Australia.

Gulf Creek was mined at around the turn of the 20th century and was once regarded as the highest grade copper mine (2% to 6.5% Cu) in NSW until its closure due to weak copper prices in 1912. Very little exploration has occurred at the project in over 100 years, with OD6 aiming to apply modern day exploration technologies.

Mineralisation is associated with magnetite, with geophysics showing significant greenfields and brownfields exploration potential exists with over >3km of untested strike in the immediate mine-stratigraphy, and over >10km across the tenement.

### Rare Earth

OD6 Metals has successfully identified clay hosted rare earths at its 100% owned **Splinter Rock and Grass Patch Projects** which are located in the Esperance-Goldfields region of Western Australia.

The Company released a Mineral Resource Estimate (MRE) for Splinter Rock in May 2024, confirming that the project hosts the largest and highest-grade clay-hosted rare earths deposit in Australia with an Indicated Resource of 119Mt @ 1,632ppm TREO and an Inferred Resource of 563Mt @ 1,275ppm TREO with an overall ratio of ~23% high-value Magnetic Rare Earths (MagREE).

OD6 Metals believes that Splinter Rock has all the hallmarks of a world class rare earths project with a conceptual development which utilises the large and high-grade Splinter Rock resource to support a long-life REE operation supported by a low strip ratio
